Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-250/92-06 AND 50-251/92-06

This refers to the inspection conducted by George B. Kuzo and Anne T. Boland of this office on February 24-28 and March 25, 1992. The inspection included a review of activities authorized for your Turkey Point facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements. Because the licensee's efforts in identifying and correcting the violation meet the criteria in Section V.G. of the Enforcement Policy and the violation was determined to be isolated with minor safety significance, the issue regarding the inadequacy of leak testing for certain sealed sources will not be subject to enforcement action.

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,
