Gentlemen:

SUBJECT: FEMA OFFSITE EXERCISE REPORT FOR TURKEY POINT NUCLEAR
POWER PLANT

Please find enclosed a copy of the Federal Emergency Management Agency's (FEMA) Report for the offsite portion of the Turkey Point Nuclear Power Plant Exercise of December 4, 1991.

As described in the enclosure, there were no deficiencies identified during this exercise. However, two areas requiring corrective actions (ARCAs) were identified. These ARCAs involved training of Traffic Control Point Personnel and placement of emergency information signs at public recreational areas.

We encourage you to assist the appropriate organizations in resolving the ARCAs and improvement items identified by FEMA. Resolution of these items should be completed prior to the next full-scale emergency preparedness exercise.

We also encourage you to work closely with the State and counties in the development of a scenario for the next full-scale exercise that will effectively test the areas in which the above items were disclosed.
