Docket Nos. 50-250, 50-251
License Nos. DPR-31, DPR-41

Florida Power and Light Company
ATTN: Mr. J. H. Goldberg
President - Nuclear Division
P. O. Box 14000
Juno Beach, FL 33408-0420

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-250/92-21 AND 50-251/92-21

This refers to the inspection conducted by G. B. Kuzo and W. B. Gloersen of this office on September 26 - October 1, 1992. The inspection included a review of activities authorized for your Turkey Point facility. The findings were discussed with those members of your staff identified in the report at the conclusion of the inspection and, in addition, during teleconferences conducted on October 28, 30, and November 5, 1992.

Areas examined during the inspection are identified in the report. In particular, the status of Radiation Protection and Emergency Preparedness programs and associated preparation and recovery efforts conducted in response to Hurricane Andrew and its aftermath were reviewed. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

This report identifies instances of loss of communication and alert/notification capability, and the failure to make offsite notifications in the required time limits due to events beyond your control. However, it was not the NRC's expectation that the systems withstand the event that occurred, nor were they required to be designed to do so. Therefore, no enforcement action is considered to be appropriate.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

JS

J. Philip Stohr, Director
Division of Radiation Safety
and Safeguards

Enclosure: (See page 2)
