

March 30, 1994

Mr. J. H. Goldberg
President-Nuclear Division
Florida Power and Light Company
P.O. Box 14000
Juno Beach, Florida 33408-0420

Dear Mr. Goldberg:

SUBJECT: TURKEY POINT UNITS 3 AND 4 - CONTAINMENT TENDON SURVEILLANCE
PROGRAM (TAC NO. M84101)

On August 10, 1993, you responded to our request for additional information concerning the 20th year tendon surveillance program for Turkey Point Units 3 and 4. The information provided was reviewed and we find your program acceptable. This completes our action on TAC No. M84101.

In your response you indicated that you are performing a re-analysis of the containment structures using the existing design basis, including a design pressure of 55 psig. As a result of the re-analysis, you plan to provide a systematic schedule for retensioning of tendons so that you can demonstrate the adequacy of the containment tendons to withstand the postulated design-basis accidents throughout the licensed lives of the plant units. This re-analysis is scheduled for completion prior to the Twenty-Fifth Year Tendon Surveillance. We understand that completion of the containment re-analysis is expected in early 1995. Please forward this analysis to us for review when it is completed.

If you have any questions about this matter, please contact me at 301-504-1481.

Sincerely,
(Original Signed By)
Richard P. Croteau, Project Manager
Project Directorate II-2
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
