SUBJECT: NRC EXAMINATION REPORT NOS. 50-250/96-300 AND 50-251/96-300

Dear Mr. Plunkett:

On June 21, 1996, the NRC completed an operator licensing examination at your Turkey Point Plant reactor facility. The enclosed report presents the results of that examination.

A Simulator Facility Report is included in this report as Enclosure 2. A copy of the Facility Comments regarding the written examination is included in this report as Enclosure 3. The NRC Resolution of Facility Comments is included as Enclosure 4. A copy of the written examination questions and answer key, as noted in Enclosure 5, was provided to members of your training staff at the conclusion of the examination.

Six candidates marginally passed the examination. The candidates exhibited significant performance deficiencies particularly in the area of diagnostic skills. The individual examination reports should be reviewed to determine if adjustments to the training program are needed.

In October 1995, fifteen candidates from your facility participated in the Generic Fundamentals Examination. Of the fifteen examined, all passed for a 100 percent pass rate.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Sincerely,

Original signed by T. A. Peebles
