Docket Nos. 50-250
and 50-251

Dr. Robert E. Uhrig, Vice President
Advanced Systems and Technology
Florida Power and Light Company
Post Office Box 529100
Miami, Florida 33152

Dear Dr. Uhrig:

SUBJECT: LONG-TERM REVIEW CONTAINMENT PURGE AND VENT VALVES

On August 31, 1981, we issued the staff's Safety Evaluation for containment purging and venting during normal operation of Turkey Point Plant, Units 3 and 4. We indicated that the Safety Evaluation was subject to additional assurance, such as debris screens, that the isolation valves will close. Your submittal dated November 17, 1982, provides a commitment to install debris screens on the purge supply and exhaust valves during the next refueling outage for each unit.

We have concluded that this commitment meets the staff's requirements to be in conformance to the Standard Review Plan Section 6.2.4 Revision 1 and Branch Technical Position CSB 6-4 Revision 1. An acceptable alternative to installing the debris screens would be to maintain the purge valves sealed-closed during Operating Modes 1 through 2.

The referenced Safety Evaluation provides the details of our review for this portion of the vent and purge issue.

Sincerely,

Original signed by:
S. A. Varga
