**Engineering Review Public Meeting**

On December 12, 2017, the staff held a public meeting with representatives from the Nuclear Energy Institute, the Union of Concerned Scientists, and several utilities, to follow up on issues raised during the October 11, 2017, public meeting on the use of licensee self-assessments in the NRC engineering inspection program. The staff presented their views on such topics as: 1) the use of engineering performance indicators; 2) the appropriate length of inspection schedules; 3) the possible future fire protection and design inspections; 4) the use of licensee self-assessments in the Reactor Oversight Process (ROP); and 5) measuring NRC inspection effectiveness. During this public meeting, the staff obtained feedback from the public on the NRC's effort to improve the effectiveness and efficiency of engineering inspections within the ROP. The working group charter, meeting summaries, working documents, and all stakeholder comments will be made publically available at:
