May 15, 1997

SUBJECT: COMPLETION OF REVIEW OF RESPONSES TO GENERIC LETTER 96-04, "BORAFLEX  
DEGRADATION IN SPENT FUEL POOL STORAGE RACKS," FOR ST. LUCIE UNIT 1  
AND TURKEY POINT UNITS 3 AND 4 (TAC NOS. M96008, M96016 AND M96017)

Dear Mr. Plunkett:

In letters dated October 18, 1996, and October 22, 1996, Florida Power and Light Company responded to Generic Letter (GL) 96-04 for Turkey Point Units 3 and 4, and St. Lucie Unit 1, respectively. GL 96-04 was not applicable to St. Lucie Unit 2 since its spent fuel pool design does not rely on Boraflex. The Nuclear Regulatory Commission (NRC) staff has completed a review of the responses to this GL and has determined that the actions necessary to address the issues discussed in the GL have been performed for St. Lucie Unit 1 and Turkey Point Units 3 and 4. Therefore, the Office of Nuclear Reactor Regulation reviews of your responses are complete. Further NRC review, if any, will be by the inspection or audit process.

Sincerely,  
Original signed by  
Frederick J. Hebdon, Director  
Project Directorate II-3  
Division of Reactor Projects-I/II  
Office of Nuclear Reactor Regulation
