PROJECT LICENSE AMENDMENT APPLICATION  
(DOCKET NUMBER: 40-8943)

Dear Chairman St Clair, Jr.:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing a request for an amendment to Source Materials License SUA-1534 that would authorize Crow Butte Resources, Inc. (the licensee) to construct and operate an in-situ uranium recovery satellite facility at the proposed Marsland Expansion Area in Dawes County, Nebraska.

Pursuant to the National Environmental Policy Act, the NRC staff has prepared a draft Environmental Assessment (EA) to document its environmental review of the amendment request. The draft EA includes a description of the proposed action and the affected environment, along with the NRC staff's preliminary determinations regarding the potential environmental impacts should the license amendment be granted.

The NRC staff is enclosing the draft EA on CD ROM for your review and comment. The draft EA can also be accessed online at: <https://www.nrc.gov/public-involve/doc-comment.html> or through the NRC's Agencywide Documents Access and Management Systems (ADAMS) at <http://www.nrc.gov/reading-rm/adams.html>. The Accession Number for the draft EA is ML17334A870. Upon your request, the NRC staff will provide a paper copy of the draft EA for your review and comment.

Please provide any information, comments, or concerns you may have on the draft EA during the comment period, which ends on January 29, 2018. Comments can be submitted by:
