September 5, 1997

Florida Power and Light Company
ATTN: Mr. T. F. Plunkett
President - Nuclear Division
P. O. Box 14000
Juno Beach, FL 33408

SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-250/97-08 and 50-251/97-08

Dear Mr. Plunkett:

On August 9, 1997, the NRC completed a safety inspection at your Turkey Point Units 3 & 4 reactor facilities. The enclosed integrated report presents the results of that inspection.

During the 6-week period covered by this inspection, your conduct of activities at the Turkey Point facilities was generally characterized by safety-conscious operations, sound engineering and maintenance practices, and excellent plant support activities.

This inspection determined that you had met the intent of Generic Letter 89-10, Safety-Related Motor-Operated Valve Testing and Surveillance. However, we noted weaknesses in the documented justifications for assumptions applied in calculations, in evaluations of stem friction coefficients, and in extrapolating dynamic test data. You have initiated action items to resolve these weaknesses in your regulatory tracking system (CTRAC). Based on our inspection findings and the actions which you initiated to address the weaknesses, the NRC is closing its review of the Generic Letter 89-10 program at Turkey Point.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

Orig signed by Kerry D. Landis

K. D. Landis, Chief
Reactor Projects, Branch 3
Division of Reactor Projects
