Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendments
Large Break Loss of Coolant Accident Re-analysis

On February 24, 1997, Florida Power and Light Company (FPL) submitted L-97-037, "Large Break Loss of Coolant Accident Re-analysis." L-97-037 requested that Appendix A of Facility Operating Licenses DPR-31 and DPR-41 be amended to modify Turkey Point Units 3 and 4 Technical Specifications Section 6.9.1.7, Core Operating Limits Report (COLR). This requested change will add Best Estimate Large Break Loss of Coolant Accident Analysis (BELOCA) to the COLR. By letter L-97-108, FPL requested an additional reference be added to the Turkey Point Units 3 and 4 Technical Specifications Section 6.9.1.7, Core Operating Limits Report, in order to document the re-analyses performed as a result of revisions to the large break LOCA methodology.

As discussed with the NRC Staff on November 17, 1997, FPL requests the attached revisions to References 4 and 6 listed in page 6-22 of the Turkey Point Units 3 and 4 Technical Specifications Section 6.9.1.7, Core Operating Limits Report. The proposed changes provide clarification to the information previously submitted to the NRC by FPL letter L-97-037. No changes have been made to the analyses or references described in L-97-037. Therefore, the conclusion of the No Significant Hazards Evaluation remains valid.

Should there be any questions on this request, please contact us.

Very truly yours,

R. J. Hovey
Vice President
Turkey Point Plant
