

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION  
RELATED TO AMENDMENT NO. 198 TO FACILITY OPERATING LICENSE NO. DPR-31  
AND AMENDMENT NO. 192 TO FACILITY OPERATING LICENSE NO. DPR-41

FLORIDA POWER AND LIGHT COMPANY

TURKEY POINT UNIT NOS. 3 AND 4

DOCKET NOS. 50-250 AND 50-251

1. INTRODUCTION

By letter dated March 12, 1998, Florida Power and Light Company (FPL or the licensee) proposed to amend the Facility Operating Licenses and Technical Specifications (TSs) for Turkey Point Units 3 and 4. The change to Turkey Point Unit 3 Operating License DPR-31 is to delete license conditions 3.I, 3.K, and 4. The change to Turkey Point Unit 4 Operating License DPR-41 is to delete license conditions 3.H, and 3.K. In addition, the amendments propose to delete outdated references included with TS Figure 5.1-2, and to incorporate a recent organization change in TSs 6.5.1.2 and 6.5.3.1.a.

The amendments are administrative in nature in that they propose to remove certain license conditions and outdated references, and to incorporate an organizational change.

2. EVALUATION

Each of the proposed changes is stated and discussed below in detail.

A. TURKEY POINT UNIT 3

- a. Remove License Condition 3.I, "Steam Generator Repair Program," including the corresponding footnotes, and add the word "DELETED."

Section 3.I.(1) references the Steam Generator Repair Program, and Section 3.I.(2) provides the temporary license conditions that were issued during the Steam Generator Repair Program. The proposed change will remove the Steam Generator Repair Program and the temporary license conditions because they have been complied with and are no longer in effect. The staff finds this change acceptable.

- b. Remove License Condition 3.K, "Integrated Schedule," and add the word "DELETED."

Sections 3.K.1 and 3.K.2 provide the Integrated Schedule license conditions that remained in effect until December 31, 1991. This proposed change will remove these license conditions because they have been complied with and are no longer in effect. The staff finds this change acceptable.

- c. Remove License Condition 4 of the License and renumber condition 5 to 4.

Section 4 refers to the implementation of recommendations in paragraphs 7b and 7c of the Summary and Conclusions section of the Final Environmental Statement Related to Operation of Turkey Point, and FPL's requirement to submit to the Atomic Energy Commission (AEC) for review and approval these recommendations no later than August 18, 1972. FPL has complied with the above license condition. This amendment change will remove section 4, and will renumber Section 5 to Section 4. The staff finds this change acceptable.

**B. TURKEY POINT UNIT 4**

- a. Remove License Condition 3.H, "Steam Generator Repair Program," including the corresponding footnotes. Add the word "DELETED."

Section 3.H(1) references the Steam Generator Repair Program. Section 3.H(2) provides the temporary license conditions that were issued during the Steam Generator Repair Program. The proposed change will remove the Steam Generator Repair Program and the temporary license conditions because they have been complied with and are no longer in effect. The staff finds this change acceptable

- b. Remove License Condition 3.K, "Integrated Schedule." Add the word "DELETED."

Sections 3.K.1 and 3.K.2 provide the Integrated Schedule license conditions that remained in effect until December 31, 1991. The proposed change will remove these license conditions because they have been fulfilled and are no longer in effect. The staff finds this change acceptable.

**C. TS Figure 5.1-2. Plant Area Map**

Delete the reference of TS Tables 4.11-1, and 4.11-2 from TS Figure 5.1-2.

TS Table 5.1-2, "Plant Area Map" shows gaseous and liquid effluent release points. The referenced TS Table 4.11-1 "Radioactive Liquid Waste Sampling and Analysis Program" and Table 4.11-2 "Radioactive Gaseous Waste Sampling and Analysis Program" were relocated from the TSs to the Offsite Dose Calculation Manual (ODCM) with the approval of License Amendment 188/182. These references do not provide any additional information regarding the identification of structures and release points. The deletion of the reference to these tables from TS Figure 5.1-2 is an administrative change intended to remove outdated references. The staff finds this change acceptable.

D. TS 6.5.1.2 Plant Nuclear Safety Committee (PNSC) Composition and TS 6.5.3.1 Technical Review and Control Activities

Add the word "Protection" in front of the word "Services" for TS 6.5.1.2 and add the word "Protection" in front of the words "Services Manager" for TS 6.5.3.1.a.

The word "Protection" is added in front of the word "Services" in TS 6.5.1.2 and in front of the words "Services Manager" to reflect the organizational change which eliminated the Services Manager position and assigned the responsibilities of TS 6.5.1.2 and 6.5.3.1.a to the Protection Services Manager. The associated levels of management controls and the required qualifications are not affected by this change. Accordingly, the Protection Services Manager will be a voting PNSC member and will be responsible for the Security Plan and implementing procedures. The staff finds this change acceptable.

Based on its review of the licensee's submittal, the staff finds that the proposed changes have no adverse impact on safety and do not pose an undue risk to public health and safety. Therefore, they are acceptable.

### 3.0 STATE CONSULTATION

Based upon the written notice of the proposed amendments, the Florida State official had no comments.

### 4.0 ENVIRONMENTAL CONSIDERATION

These amendments involve a change in the installation or use of a facility component located within the restricted area as defined in 10 CFR Part 20. The NRC staff has determined that the amendments involve no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite, and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that the amendments involve no significant hazards consideration,

and there has been no public comment on such finding (63 FR 17225). Accordingly, these amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(9). Pursuant to 10 CFR 51.22(b) no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendments.

#### 5.0 CONCLUSION

Based on the staff evaluation in Section 2.0 above, the staff concludes that the proposed TS changes are acceptable.

The Commission has concluded, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) such activities will be conducted in compliance with the Commission's regulations, and (3) the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.
