General Comment

The "other entities" discussed in the purpose should be defined. It is not clear as stated who these entities are and if the NRC actually has authority to regulate them? The purpose is stated as: The purpose of this procedure is to provide guidance for U.S. Nuclear Regulatory Commission (NRC) staff and describe the process for documenting, reviewing, and approving (on a case-by-case basis) requests received from licensees, license applicants, and other entities for alternative disposal of licensed material.
