Subject: [External_Sender] Request from Rare Element Resources

Good morning Ken,

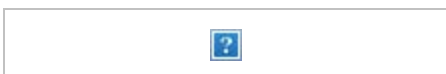

Pursuant to our call this morning here is Rare Element Resources request to the NRC.

Rare Element Resources plans to request a restart of the licensing activity with the NRC subject to receiving a better understanding from the NRC regarding possible budget and schedule for the activity. For financial planning reasons, we are not able to formally request a restart at this time, but do request that RER and NRC schedule a meeting in late January or February to provide the NRC with an update on the status of our Bear Lodge Project, and to discuss the budget and schedules. We ask that RER remain “in the que” during this period until the meeting is held and a formal request can be made.

We appreciate your consideration and look forward to our discussions early in the new year.

Best regards and well wishes for a happy and safe New Year.

Randy Scott
