Yen-Ju Chen, Sr. Project Manager – Licensing Branch  
Division of Spent Fuel Management  
Office of Nuclear Material Safety and Safeguards

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555-0001

Docket No. 72-1014, Certificate of Compliance (CoC) No. 1014

Subject: Submittal of Revised Supplemental Information on NRC's RAIs for HI-STORM 100  
LAR 1014-11

Reference(s): [1] "Submittal of Supplemental Information on NRC's RAIs for HI-STORM 100  
LAR 1014-11," Holtec Letter 5014829, from K. Manzione (Holtec) to Y. Chen  
(NRC) dated November 10, 2017.

Dear Ms. Chen:

By letter dated November 10, 2017 [1], Holtec submitted supplemental information to the NRC staff's requests for additional information. Subsequent discussions with NRC staff indicated that some editorial revisions to that information would help aid in an efficient review. Therefore, this letter contains versions of the HI-STORM 100 CoC and FSAR (Attachments 1 and 2) with all changes from the initial submittal, RSIs, RAIs, and the current supplement marked using track changes. This package should provide a complete summary of all of the changes related to Amendment 11 for the staff to complete their review.

If you have any questions please contact me at 856-797-0900 ext. 3951.

Sincerely,

A handwritten signature in cursive script that reads "Kimberly Manzione".

Kimberly Manzione  
Licensing Manager,  
Holtec International
