)	50-403

REVISIONS TO STAFF'S PROPOSED FINDINGS OF FACT

Pursuant to the Board Order of May 25, 1979, the NRC Staff submits the following revisions to its proposed findings to reflect those changes in Applicant's management organization reflected in a letter from the Applicant of May 18, 1979, and an affidavit of J. A. Jones dated June 7, 1979. The Staff does not object to the admission of that affidavit as Applicant's Exhibit PP. It is noted that the Staff has limited its proposed findings based on the supplemental material in this affidavit to the "hard facts" in the affidavit and has excluded statements of intent and policy.

The Staff's revisions to its proposed findings are:

1. The first three sentences of this proposed finding should read:

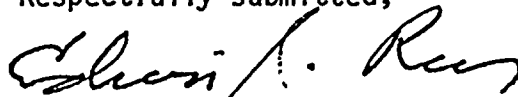

13. At the hearing commencing on February 27, 1979, it was established that Carolina Power & Light Company (CP&L) has divided its corporate organization into two main areas, administration and operations. J. A. Jones was Executive Vice President and Chief Operating Officer for CP&L. (Jones following Tr. 3494, pp. 9-11, 26-29). Reporting to Mr. Jones were three Senior Vice Presidents (M. A. McDuffie, Engineering & Construction Group; E. E. Utley, Power Supply Group; and W. J. Ridout, Customer & Operating Services Group) and a Department Head (W. W. Morgan, Systems Planning & Coordination Department). (Jones, pp. 13-15).

7902190617

2. A new proposed finding should be added reading:

13b. Subsequent to the hearings, CP&L supplemented that testimony, with consent of the parties, to report changes in the CP&L's management organization which were approved by its Board of Directors on May 16, 1979. (Applicant Exhibit PP). Mr. Jones' title changed to that of Senior Executive Vice President and Chief Operating Officer. Reporting to him are Executive Vice President, E. E. Utley (responsible for the Power Supply and Customer Services Groups), the Senior Vice President--Engineering and Construction Group, M. A. McDuffie, and a Vice-President for Nuclear Safety and Research. Reporting to Mr. Utley are two Senior Vice Presidents (D. V. Menscer, Power Supply Group; and W. J. Ridout, Customer & Operating Services Group). (Applicant Exhibit PP at 2, Fig. B). Effective September 1, 1979, the new Nuclear Safety and Research Department will be headed by Dr. Thomas S. Elleman, who presently is Chairman of the Department of Nuclear Engineering at North Carolina State University, as a Vice President of CP&L. He will be responsible for the functions of Corporate Health Physics and Corporate Nuclear Safety and Quality Assurance, in addition to research functions within the Company. The director of Corporate Health Physics and the manager of Corporate Nuclear Safety and Quality Assurance Audit will also continue to have direct access to Mr. Jones. (Applicant Exhibit PP at 3).

Respectfully submitted,

Edwin J. Rejs
Assistant Chief Hearing Counsel

Dated at Bethesda, Maryland,
this 18th day June, 1979.
