Dr. Harold Denton  
Director NRR  
NRC  
Washington, D.C. 20555

Dear Dr. Denton:

We understand that Carolina Power & Light is requesting from you an exemption from a full scale emergency plan test before the opening the Shearon Harris Nuclear plant in North Carolina. We urge you not to grant that request. We Further urge you to require participation by a majority of the people in the emergency zone in order to determine the adequacy of this evacuation plan.

We further request that the NRC expand the emergency radius to 50 miles. It is our understanding that your are considering reducing that radius to 2 miles. Considering what we all know about nuclear fall out - even us laymen - we don't understand how that could be justified. Do you feel it is your obligation to protect the profits of utility companies, or the well-being of the people who are paying for these "NUCLEAR WASTE-PRODUCING PLANTS" through their utility bills?

We would expect it to be the resposibility of the NRC to deal as stringently as possible with the company that has the disastrous safety record that CP&L has with the NRC.

Please let us know what the NRC is doing in regard to these matters.

Thank you.

Sincerely,

*Jerry and Cathy Bruno*
