Harold Denton  
Director of Nuclear Reactor Regulations  
US NRC

Dear Mr. Denton,

I live close to the Shearon-Harris Nuclear Power Plant. After reviewing CP&L's record, and talking to people who worked there, I am scared beyond words.

Please do not grant CP&L exemption from their full scale emergency evacuation practice before opening this plant. And please keep the evacuation plan requirements at a 10 mile radius, at the very least.

We need more time to prepare ourselves for the opening of the Harris Plant. The public needs to be informed about potential dangers, accidents and costs of nuclear energy. At this point it seems highly unlikely that CP&L will consent to converting this plant. I feel we are making an inhumane decision in allowing the propagation of nuclear energy and waste.

This is a slow (and sometimes not so slow) suicide of the Earth and her people. For all of us who love our Mother Earth, fresh air, clean water, and living trees, we pray that the Great Spirit will guide you, and all of you in policy making positions.

Good luck. Namaste.

In Oneness,

*Lynn Harris*  
Lynn Harris
