Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-400/86-84

As a result of the NRC inspection (50-400/86-62) conducted July 7-25, 1986, an unresolved item (86-62-01) was identified to you at the exit interview. The unresolved item involved the failure of the quality assurance program to identify all electrical separation deficiencies. Subsequently, the unresolved item was upgraded to a violation as a result of the NRC inspection conducted on August 25-28, 1986, and identified to you in NRC report 50-400/86-66 dated October 10, 1986.

Meetings were held with CP&L on August 29 and September 25, 1986, in the Region II office to discuss the root cause and possible generic applicability to other construction activities at the Shearon Harris Plant. NRC concerns relative to the inspection findings were discussed with you and your staff in an Enforcement Conference held on October 9, 1986.

A summary of the Enforcement Conference is documented in the enclosed Inspection Report (50-400/86-84).

Sincerely,

ISI

J. Nelson Grace
Regional Administrator
