Raleigh, NC 27602

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-400/89-08

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by W. H. Bradford on March 29 - April 24, 1989. The inspection included a review of activities authorized for your Harris facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies activities that appear to violate NRC requirements but are not cited; therefore, no response is required.

Your attention is invited to the unresolved item identified in the Inspection Report. This matter will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(Original signed by HCDance/for)

David M. Verrelli, Chief
Reactor Projects Branch 1
Division of Reactor Projects
