SAFEGUARDS INFORMATION REMOVED

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-400/89-19

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by Ms. Orysia M. Masnyk on August 21-25, 1989. The inspection included a review of activities authorized for your Harris facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies events that appear to violate NRC requirements, three of which relate to security officers being inattentive or asleep on duty. In that these events meet the criteria of Section V.G.1 of the NRC Enforcement Policy for non-cited violations they are not being cited, and no response is required. However, we are concerned with the continued occurrence of Security Officer being inattentive and believe that increased awareness and emphasis is necessary and warranted. We will review activities relating to security officer performance in subsequent inspections.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure. Therefore, the enclosure to this letter with the exception of the report cover page, which presents a nonexempt summary, will not be placed in the NRC Public Document Room.
