EP-FC-1001 Rev 2 issued 07/28/2017	EP-FC-1001 Rev 3 issued 12/13/2017

Summary of Changes: Fort Calhoun Station has entered into the decommissioning process on site. With that, changes to document and procedure titles are taking place. This change is being made to update the Emergency Plan to reference the recent change from the Updated Safety Analysis Report (USAR) to the Defueled Safety Analysis Report (DSAR) recently issued at FCS. Additionally, training and RP procedure changes have been made to transition into the decommissioned training process. The term TLD's was updated to DLR's and organization position title changes were also made. Updating the emergency plan to correctly reference the currently issued procedures, terms, and titles in no way reduces the effectiveness of the FCS Emergency Plan.

Recently FCS implemented strategies associated with the Fukushima Near-Term task force recommendations in Order EA-12-049 that implements various FLEX/SAFER strategies for beyond design bases external events. Due to FCS ceasing operations and entering a permanently shut down/defueled condition FCS had asked for relief for Order EA-12-049 due to the minimal risk present under current conditions. On June 14, 2017 (NRC-17-031) the NRC withdrew in its entirety Order EA-12-049 for FCS based on information provided by FCS. Due to the removal of any FLEX/SAFER ties and commitments references to INPO are being removed from this procedure. The FLEX ties were the last applicable portion of the INPO Letters of Agreement as FCS is no longer an operating plant nor an active member of INPO. Revising the plan to reflect the current and relevant Letters of Agreement in no way reduces the effectiveness of the Emergency Plan.

 Manager – Site Emergency Planning
