Docket No. 50-400
License No. NPF-63

Carolina Power and Light Company
ATTN: Mr. Lynn W. Eury
Executive Vice President
Power Supply
P. O. Box 1551
Raleigh, NC 27602

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-400/91-05

This refers to the Nuclear Regulatory Commission's (NRC) inspection of your Fitness For Duty Program, required by 10 CFR Part 26, conducted by William Tobin, Region II, on March 26-28, 1991. At the conclusion of the inspection, the results were discussed at an exit meeting with those members of your staff identified in the enclosed inspection report.

The inspection consisted of selective examinations of your Drug and Alcohol Abuse Policy, corporate and site implementation procedures, chemical testing program, interviews with employees and contractors, observation of your Collection Facility and review of pertinent records and reports.

Within the scope of the inspection, violations or deviations were not identified.

As described in the enclosed Report, we are pleased to note several strengths in your Fitness For Duty (FFD) Program; the professionalism of your FFD Corporate and Site staff to include your Employee Assistance Program staff, FFD training, supervisory review of work done by employees with positive screening results, and the "special processing" of specimens with low creatinine measurements.

One Inspector Followup Item is worthy of your attention. Your FFD staff has identified one issue relative to the infrequency of conducting random drug testing on weekends. Based upon comments at the Exit Meeting we understand that you will be testing more frequently on weekends such that employees and contractors will be eligible for unannounced random testing at any time.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
