SHEARON HARRIS NUCLEAR POWER PLANT
DOCKET NO. 50-400
LICENSE NO. NPF-63

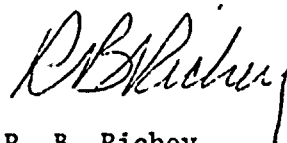

Gentlemen:

In our letter of November 11, 1992, Carolina Power & Light Company (CP&L) responded to the Notice of Violation issued with Inspection Report No. 50-400/91-13, dealing with the use of Auxiliary Feedwater during plant startup.

As noted in our original response, full compliance with the Technical Specifications has been achieved, but an additional action to submit a change request to clarify Technical Specifications was planned. Following additional analysis, it has been determined that a change to Technical Specifications is not required at this time. Additional changes to Auxiliary Feedwater and/or the Technical Specifications may be pursued at a later time as a plant enhancement. All actions required to address this Notice of Violation have been completed.

If you should have any questions concerning our corrective actions, please contact us.

Very truly yours,

R. B. Richey
Vice President
Harris Nuclear Project
