Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-400/92-09

This refers to the inspection conducted by A. T. Boland of this office on June 1-5, 1992. The inspection included a review of activities authorized for your Shearon Harris facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements. Because the licensee's efforts in identifying and correcting the violation meet the criteria in Section V.G. of the Enforcement Policy and the violation was determined to be isolated with minor safety significance, the issue regarding the adequacy of leak testing for certain sealed sources will not be subject to enforcement action.

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
