James,

Attached is KNSPC's response to your data request.

Thank you,

Ian

Hi Ian,

I just heard back from my colleague with the business credit card. Evidently, being a national laboratory, the lab's policy on credit card payments is that the lab first receive the product and then pay instead of the reverse. Let me know if this poses a problem for the Nature Preserves Commission. We already have paid the TN Natural Heritage Program (NHP) (housed within TDEC) with a credit card after receipt of the data. Let me know your further thoughts on this.

Thanks,

Jim

Jim,

Below is the invoice for the Clinch River SMR data request. Data and letter will be emailed when payment occurs. Thanks

Ian

Purchase Order Number _____

Data Request 18-020

This letter is an invoice for the amount of \$ 337.50 for data services requested September 27, 2017 for the Clinch River Small Modular Reactor in Bell and Whitley Counties, KY.

Please make payment to the Kentucky Nature Preserves Fund using our online credit card payment system. Payment is due upon receipt.

<https://secure.kentucky.gov/formservices/KSNPC/PaymentProcessing>

(be sure to include the Data Request Number).

Please contact us if we can be of further assistance.

Hi Ian,

I think you left me a voice mail while I was out last week regarding the request in the below email. The VM came across somewhat garbled, so I hope it was you. Attached to this email is the official request form to go with the shape files for the transmission line segment that were an attachment to the below email. Note that if you normally process data requests

th

within a larger buffer than 0.125 (1/8) mile, if you could report the distance from the transmission line for each occurrence within your buffer that will enable me to select those that are more or less within 0.125 (1/8th) mile.

If you have any questions, please call me at 509-371-7186.

Thank you,

Jim

Subject: KY NHP review of transmission line segment for Clinch River SMR ESP project in Tennessee

Hi Ian and Martina,

The request concerns the attached shape files of one transmission line segment of about 26.5 miles located in Kentucky that could be modified as part of the above project. Could Kentucky State Nature Preserves Commission please identify species and habitats (terrestrial and aquatic) of concern to both the State and Federal governments within about 0.125 (1/8th) mile on either side of the transmission line segment.

If you could report findings in a sortable spreadsheet, that would be much appreciated. Note that we do not need coordinates for species/habitat locations rather just a list of the species/habitats with occurrences within the specified buffer.

Thank you very much for helping us with this. If you have any questions, please call me at 509-371-7186.

Thank you,

Jim Becker
