DOCKET NO. 50-400/LICENSE NO. NPF-63  
SUPPLEMENT TO A REPLY TO NOTICE OF VIOLATION  
(NRC INSPECTION REPORT NO. 50-400/97-01)

Dear Sir or Madam:

On April 14, 1997, Carolina Power & Light (CP&L) responded to the Notice of Violation enclosed in NRC Inspection Report 50-400/97-01 dated March 13, 1996. The purpose of this letter is to supplement our reply to the Reported Violation "B" regarding an error in procedure EST-702, Moderator Temperature Coefficient - End-of-Life Using the Boron Method, which effected calculations of moderator temperature coefficient for previous fuel cycles. Although the identified error was corrected, our reply stated that further enhancements to EST-702 would be made prior to its next performance. CP&L is supplementing the previous reply dated April 14, 1997 as follows.

Under Corrective Steps Taken and Results Achieved, add the following:

"Since EST-702 is not expected to be performed again until approximately June 1998, the procedure has been placed on administrative hold to ensure it is not performed until further enhancements are made."

Under Corrective Steps That Will Be Taken to Prevent Further Violations, replace the current statement with the following:

"No additional actions are required to prevent further violations."

Questions regarding this matter may be referred to Ms. D. B. Alexander at (919) 362-3190.
