SHEARON HARRIS NUCLEAR POWER PLANT
DOCKET NO. 50-400/LICENSE NO. NPF-63
REQUEST FOR NRC REVIEW OF INSERVICE INSPECTION RELIEF REQUESTS

Dear Sir or Madam:

By letter dated January 27, 1998, Carolina Power & Light Company (CP&L) submitted the Harris Nuclear Plant (HNP) Second Ten-Year Interval Inservice Inspection (ISI) Program Plan to the NRC. The ISI Program Plan included 19 relief requests which require NRC approval.

Of the 19 relief requests, six (6) involve inspections to be conducted during Refueling Outage 8 (RFO8), scheduled to commence October 24, 1998. Relief request 2R1-010 was submitted pursuant to 10 CFR 50.55a(a)(3)(ii) on the basis that compliance with the original examination requirements would result in hardship or unusual difficulty without a compensating increase in the level of quality and safety. Relief requests 2R1-003, 2R1-004, 2R1-006, 2R2-003 and 2R2-005 were submitted pursuant to 10 CFR 50.55a(g)(6)(i) on the basis that the original examination requirements have been determined to be impractical.

CP&L requests NRC review of these six (6) relief requests prior to September 30, 1998 in order to avoid adverse impact on the schedule for inservice inspections to be performed during RFO8.

Please refer any questions regarding this matter to Mr. J. H. Eads at (919) 362-2646.

Sincerely,

240004
