RE: Draft Supplement to the DEIS related to the operation  
of the Susquehanna Steam Electric Station, Units 1 & 2  
Docket Nos.: 50-387 and 50-388

The draft supplement to the DEIS covering the proposed construction of the Pond Hill Creek storage reservoir for the Susquehanna Steam Electric Station has adequately addressed the probable impacts to highway facilities. However, the supplement still lacks evidence of coordination with the Pennsylvania Department of Transportation. Since the pump station construction will affect Route 239 (pg. 4-12) and an access road will be added for the reservoir construction, we repeat our comment of August 9, 1979, recommending coordination with PA DOT.

Sally H. Cooper  
Regional Representative  
of the Secretary

It's a law we  
can live with.

Cooper
