Dear Mr. Lear:

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

On January 24, 1977, Niagara Mohawk Power Corporation submitted proposed changes to the Nine Mile Point Unit 1 Environmental Technical Specifications (Appendix B to DPR-63) together with Supporting Information. The information contained in this submittal has since been discussed a number of times by our staffs.

At an April 7, 1978 meeting in your offices, members of your staff requested additional summary information related to the impact of Nine Mile Point Unit 1 operation on various species in Lake Ontario.

In response to this request, find attached ten copies of a report entitled "Submission in Support of Environmental Technical Specification Change for Nine Mile Point Nuclear Station Unit 1" dated June 1978. This report provides further justification for the deletion of Sections 3.1.1a, 3.1.1b(1) & (2), 3.1.2a(1) & (3) and 3.1.2.b. This report also provides additional information to support changes proposed in our January 24, 1977 submittal related to Section 3.1.2a(2), "Impingement of Organisms."

Very truly yours,
NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise
Vice President-Engineering
