---

During the recent Follow-Up/Periodic IMPEP review of Utah's Radioactive Materials Program, it was determined that the NRC's request for an opinion from the Utah Attorney General's Office, as stated in a letter dated November 25, 2015, (ML15306A276) regarding inspection authority, remains open. This letter serves as a response to the NRC's request.

Please feel free to contact us if you have any questions.

Thank you,  
Rusty
