1. The purpose of this document is to provide a comprehensive overview of the current status of the project. It is intended for the use of management and other stakeholders who are involved in the project's execution.

2. The project has been initiated in accordance with the approved business plan and is currently in the early stages of implementation. The primary objective is to ensure that all project goals are met within the specified timeline and budget.

3. The project team has identified several key risks that could potentially impact the project's success. These risks are being actively monitored and managed to minimize their potential negative effects.

4. The project is currently on track, and the team is making good progress towards the completion of the project. It is expected that the project will be completed by the end of the fiscal year.

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, DC 20555

SHEARON HARRIS NUCLEAR POWER PLANT
UNIT NO. 1 - DOCKET NO. 50-400
PRE-SERVICE INSPECTION PROGRAM

Dear Mr. Denton:

Carolina Power & Light Company (CP&L) hereby informs you of revisions to the Shearon Harris Nuclear Power Plant (SHNPP) Pre-Service Inspection (PSI) program nondestructive testing and acceptance criteria.

In a March 13, 1983, PSI program submittal, CP&L stated:

"10 CFR 50.55(a) establish (sic) the edition of [ASME Boiler and Pressure Vessel Code] Section XI applicable to the PSI of the Reactor Pressure Vessel based upon the construction permit which was issued on January 27, 1978. However, it is the intention of CP&L to comply with the requirements of Section XI, 1980 Edition with Addenda through Winter 1981. This represents a voluntary upgrade from the applicable 1974 Edition, Summer 1975 Addenda....CP&L feels that this code upgrade will meet the intent of 10 CFR 50.55(a) and Section XI".

Furthermore, in a March 7, 1984 submittal of the PSI Program Plan (ISI-201), CP&L stated:

"The scope of examinations, procedures and acceptance criteria meet the requirements outlined in Section XI of the ASME Boiler and Pressure Vessel Code, 'Rules for Inservice Inspection of Nuclear Power Plant Components,' 1980 Edition, with Addenda through Winter 1981."

In September 1985, the NRC amended 10 CFR 50.55(a) to permit the use of the ASME Section XI, 1980 Edition with Addenda through Winter 1982. Therefore, CP&L has revised the SHNPP PSI program to upgrade the nondestructive testing and acceptance criteria to comply with ASME Section XI, 1980 Edition with Addenda through Winter 1982.
