SUBJECT: Request to Amend License Number: 09-23977-01E

Dear Mr. Struckmeyer,

DRS Training and Control Systems, LLC would like to apply for an amendment to our current NRC Material License 09-23977-01E, Docket No. 03038022.

This request is in regards to modifying Item Number 7 and 10 on our current license. These suppliers have all been previously utilized, (excluding new supplier NRD) and in the future will need to be sent for proper disposal. Other than the change in supplier and microcuries, all original product specifications will remain the same with the proposed new supplier below.

Amendment to Item Number 7:

- A. Foil Sources (NRD Model A-001)
- B. Foil Sources (Eckert & Ziegler Model 3919) *These sources are in scrap inventory from previous use; included for future disposal
- C. Foil Sources (AEA Model AMM.1001H)
- D. Foil Sources (QSA Global Model AMM.1001H) *These sources are in scrap inventory from previous use; included for future disposal

Amendment to Item Number 10:

Maximum Quantity per Device – 0.8 microcurie

*Note: Original "Description of Radioactive Source" document sent with application of license in 2002 shows that the actual microcurie reading for these foil sources is 0.8 microcuries, not 0.7 microcuries.

If further clarification or information is required, please feel free to contact me at your earliest convenience.

Sincerely,

Brett Byers
