and Emergency Preparedness
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission

FROM:

Richard W. Krimm
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological
Hazards Programs

SUBJECT: Exercise Report for the February 28, 1987, Exercise
of the Offsite Radiological Emergency Preparedness (REP)
Plans for the Shearon Harris Nuclear Power Plant

Attached is a copy of the Exercise Report for the February 28, 1987, full participation joint exercise of the offsite REP plans for the Shearon Harris Nuclear Power Plant. The State of North Carolina and Wake, Chatham, Harnett and Lee Counties, all located in the 10-mile plume emergency planning zone (EPZ), fully participated in the exercise.

The exercise report, dated May 21, 1987, was prepared by the Region IV staff of the Federal Emergency Management Agency (FEMA). The report does not identify any deficiencies resulting from this exercise. There were identified, however, eight areas requiring corrective actions and several areas recommended for improvement. The inadequacies identified at the Media Center were deemed serious enough to warrant prompt remedial action. A remedial drill to correct the inadequacies of the Media Center was conducted on April 22, 1987. All Media Center activities or procedures evaluated as inadequate during the February 28, 1987, exercise were re-evaluated and determined to be adequate during the remedial drill. The results of the April 22, 1987, drill are included in the attached report. In addition, a special drill will be conducted to verify correction of the inadequacy involving the Wake County Emergency Operations Center communication links with the Emergency Broadcast System and NOAA radio. The results will be forwarded to you upon completion of the drill.

FEMA Region IV staff will furnish a copy of this exercise report to the State of North Carolina and will obtain a schedule of corrective actions. The Region will assure completion by the State of the necessary corrective actions. Based upon the results of this exercise, there continues to be reasonable assurance that appropriate protective measures can be implemented by the offsite jurisdictions around the Shearon Harris Nuclear Power Plant to protect the health and safety of the public in the event of a radiological emergency.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 646-2860.
