Subject: Re: Request for Public Drinking Water Pumpage data for 2015 or 2016

Philip,

I went ahead and pulled the data so you can proceed with your project. See attached EXCEL spreadsheet. First sheet is 2016 pumpage data and second sheet is the Design Capacities. I have some spots of missing data (4 water systems) on the 2016 pumpage data (highlighted fields). I will attempt to gather this data from the water systems, but it may take a while to get this back from the water operators.

Pumpage data is in Million Gallons per Day (Average for month) and (Maximum Day in the month)

Design Capacity is in Million Gallons and gives both Average Daily Production and Maximum Daily Design Capacity.

Please let me know if you need anything else.
