About Ridge

Ridge Instruments continues the tradition of excellence which began in 1959, when D.J. Yeager formed the company. In 1984, Tim Yeager purchased the business and has continued the tradition of excellence started by his father. Since 1985, RIDGE has performed over 700 contracts with the Department of Defense, supporting various missile systems such as TOW, Hawk, Maverick, Patriot, Hellfire and Longbow with the production of various assemblies.

In 2004, RIDGE expanded its capabilities by acquiring Electro Design Manufacturing, a recognized manufacturer of TOW 2 Missile Launchers and upgrade kits. Simultaneously, RIDGE acquired Technical Systems Inc., which increased its capability to produce electronic, cable, and electromechanical assemblies, as well as wave-soldered multilayer circuit card assemblies.

RIDGE maintains the flexibility of a small company, but with the resources of a larger business. We are utterly committed to integrity and fairness in our dealings with customers, employees, suppliers, and associates. Our constant pursuit of higher quality, improved profitability, and closer customer relations gives our customers the competitive advantage.
