SUSQUEHANNA STEAM ELECTRIC STATION  
IE BULLETIN NO. 77-02  
ER 100450 FILE 840-4  
PLA-205

Dear Mr. Grier:

In response to IE Bulletin No. 77-02, Pennsylvania Power & Light Company has verified that Bechtel is not using the referenced Westinghouse AR Relays in any component provided by them. However, we have not yet verified that packaged system components, such as the Westinghouse Hydrogen Recombiners or the diesel generators, do not employ these relays.

To verify the extent of the Westinghouse AR Relay use and if required corrective actions have been taken; Pennsylvania Power and Light Company is canvassing the vendors of packaged systems.

We anticipate that a full response to this bulletin will be available about January 30, 1978.

Very truly yours,

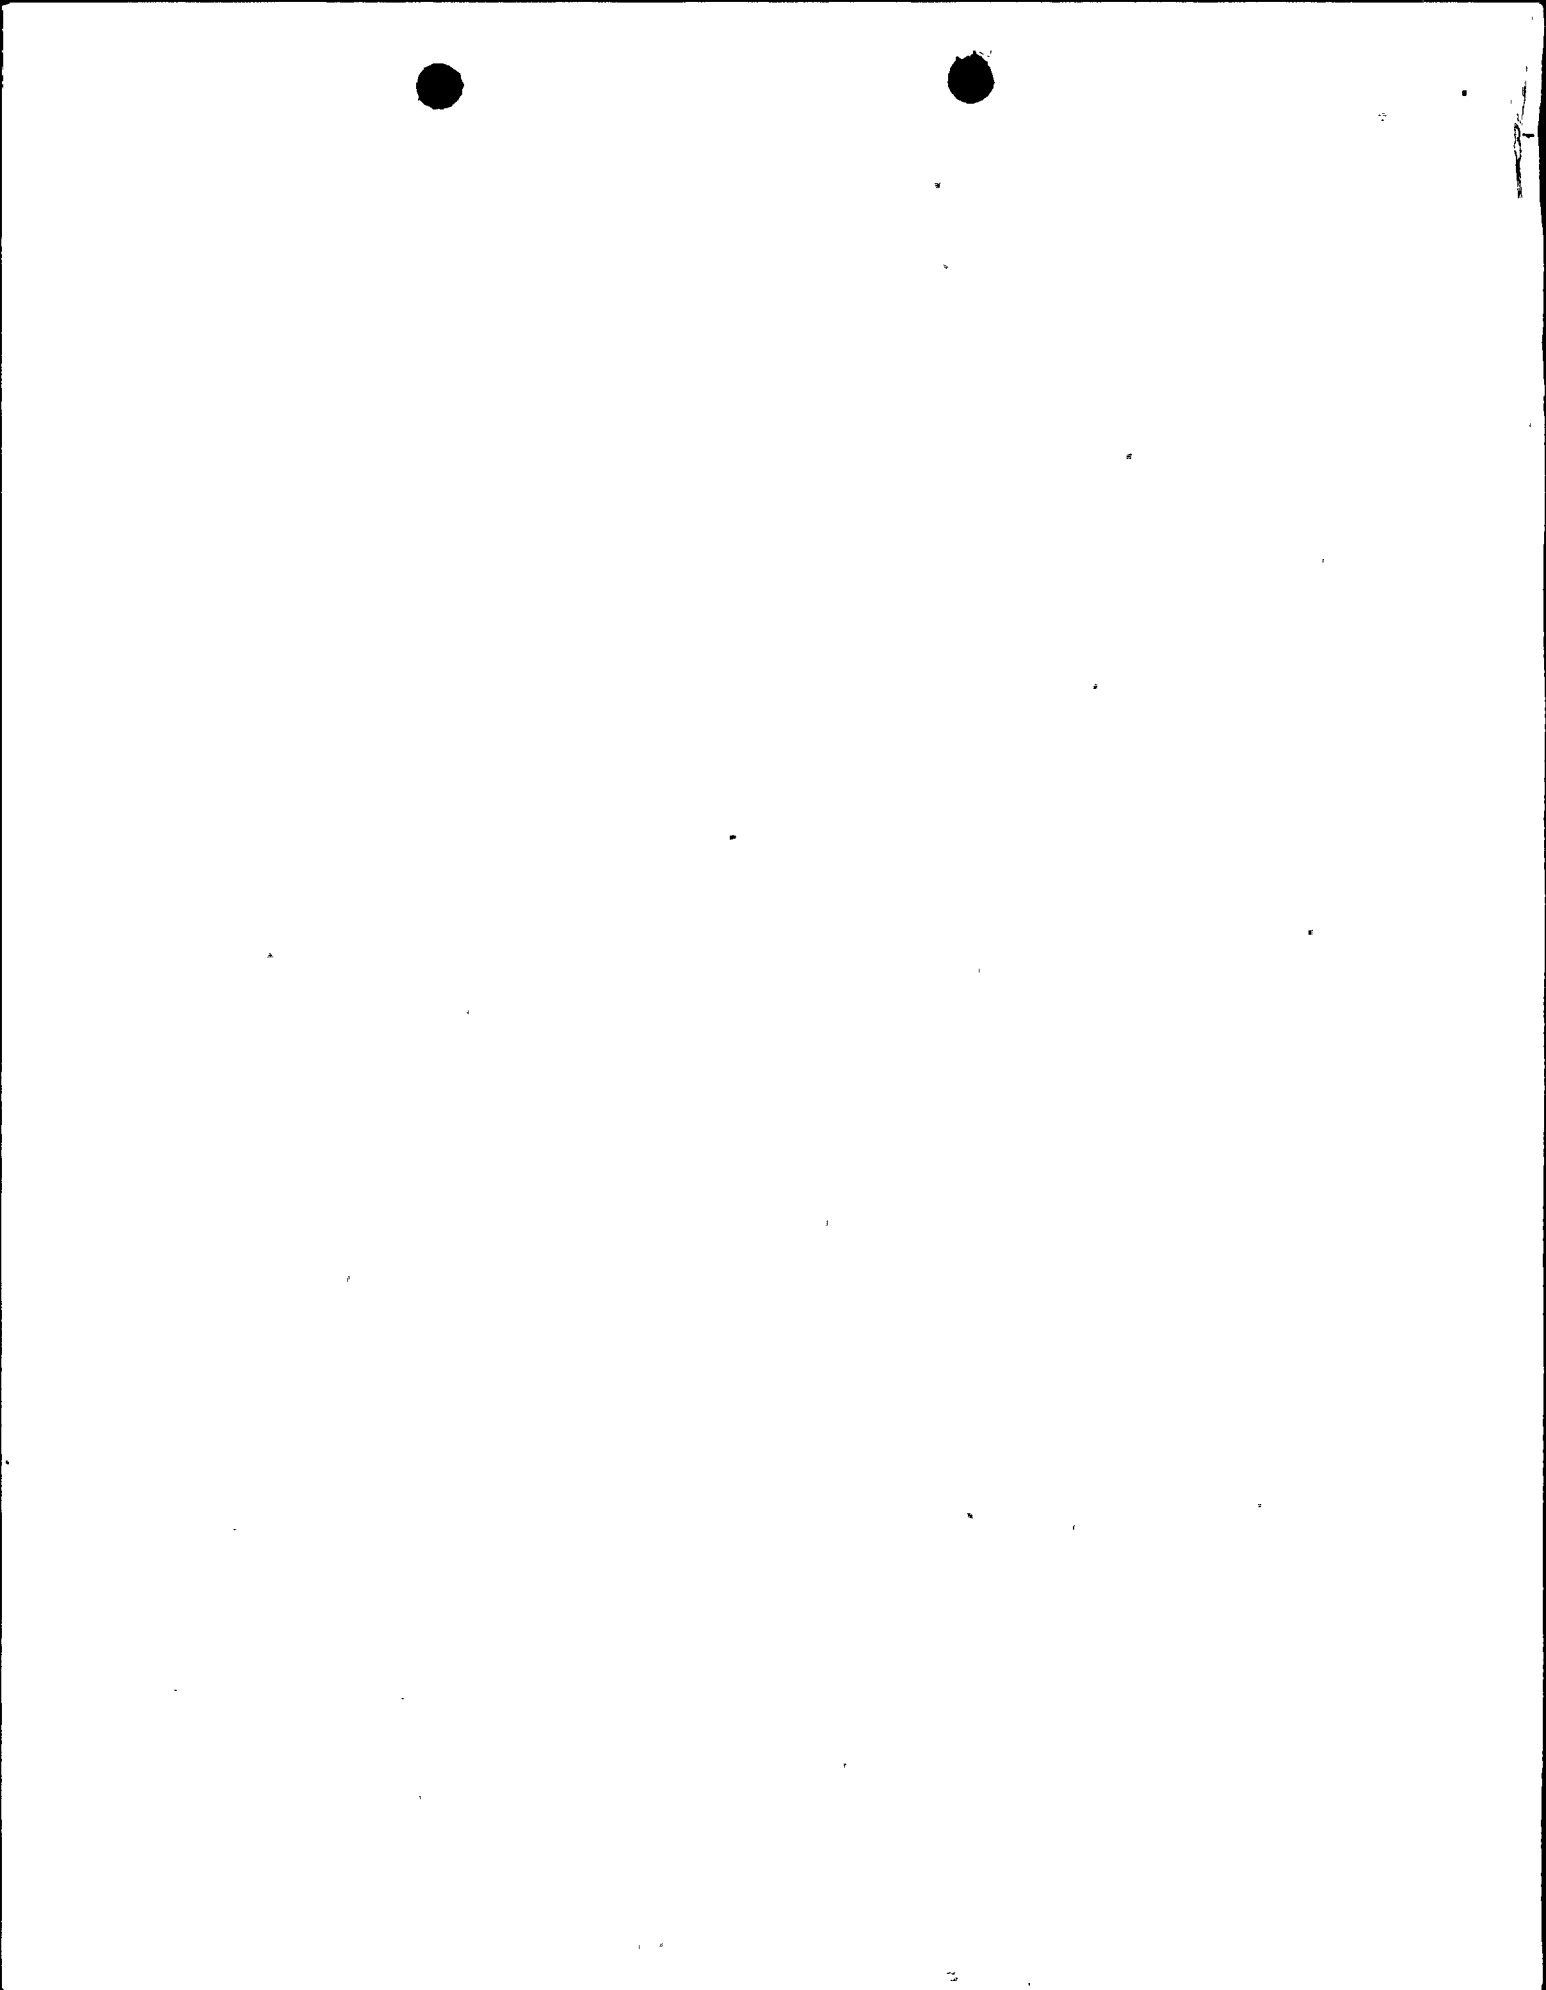

N. W. Curtis  
Vice President - Engineering and Construction
