Dear Briana,

I just received your message. Here is the entire monthly report as a single pdf file. Please let me know if you need anything else.

Sincerely,
Steve

Hi Steve,

Would you be able to resend this report to me? The NRC mail system removed all of the attachments. This isn't usually a problem, so I am hoping it's an anomaly. Thanks!

Subject: Marine Turtle Removal Monthly Summary

November 2017

Dear Meghan,

Attached, please find the monthly summary of marine turtle removals for November 2017. This month, we captured 12 *Caretta caretta* and 22 *Chelonia mydas* in the intake canal of the St. Lucie power plant on Hutchinson Island. There were no mortalities or sea turtles sent for rehabilitation in November. However, one smalltooth sawfish was entrained into the intake canal this month which resulted in the power plant exceeding the take limit established by the most recent Biological Opinion as set forth by the National Marine Fisheries Service (NMFS).

On November 2nd, a smalltooth sawfish (*Pristis pectinata*) became entangled in the turtle capture nets at the St. Lucie Power Plant intake canal. Additional resources from IRG, FPL, and Harbor Branch Oceanographic Institute (HBOI) were called in to assist with the removal. Removal was completed according to the Smalltooth Sawfish Handling, Transportation, and Release Protocols (FPL 2007) and recent smalltooth sawfish on-site training (2016). The smalltooth sawfish was an adult female with a total length of 372 cm and an estimated weight of 200 kg. The animal was in good condition with only minor fresh scrapes. Tissue samples were collected and tags applied by HBOI biologists under NMFS permit 21043. It was successfully released into the ocean adjacent to the intake canal beach access. Thereafter, IRG biologists monitored the three-mile stretch of beach near the release site for any possible delayed impacts on the captured smalltooth sawfish for seven days. The incidental take limit established by the 2016 Biological Opinion set forth by NMFS is one non-lethal capture (take) of U.S. Distinct Population Segment smalltooth sawfish every five years. Therefore, as this is the second smalltooth sawfish encountered in the intake canal this year, FPL has exceeded its take limit and must reinitiate a section 7 consultation with NMFS.

The permanent 5-inch barrier net encountered light loads of algae during the month of November. Underwater Engineering Services continued to inspect the A-1-A barrier net weekly and removed accumulated algae and debris as needed. Furthermore, IRG inspected the entire length of the intake canal (up to the security barrier) at least twice daily for turtles that may have made it past the primary or secondary barrier nets. The area between the 5-inch and 8-inch barrier nets was also monitored periodically with a small john boat. No turtles were encountered west of the primary barrier net in November.

The tag numbers and morphometric data for all turtles captured during the month have been included with this report (see attachments/addendums). Also included is a spreadsheet for all captures, mortalities, injuries, and causal events delineated by species and by month for 2017. In addition, this spreadsheet tracks fresh scrapes incurred on captured turtles for the current month, as well as the entire year. An additional Excel spreadsheet tracks all causal injuries and mortalities incurred by sea turtles at the St. Lucie Plant since 2004.

Please feel free to contact me with any questions.

Sincerely,

Steve

NOTES

1. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 5/30/2017 and 11/5/17.
2. Adult female. Tail length = 240 mm.
3. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 11/12/11, 2/22/15, and 11/5/17.
4. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 4/10/12, 12/18/12, 3/29/13, 12/13/13, 9/7/14, 7/25/15, 2/23/16, 6/27/17, 10/22/17, and 11/6/17.
5. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 5/30/89, 9/6/90, 10/11/90, 10/15/90, 2/23/91, 8/10/92, 8/27/92, 9/21/92, 1/6/93, 6/8/93, 12/29/93, 3/22/94, 10/31/94, 3/17/95, 4/20/95, 2/7/96, 4/7/96, 7/11/96, 7/23/96, 7/29/96, 9/22/96, 10/9/96, 6/13/97, 5/15/98, 4/15/00, 6/13/00, 9/8/00, 11/19/00, 11/15/01, 9/16/02, 4/30/03, 11/24/03, 3/31/04, 9/15/04, 10/25/04, 8/10/05, 8/16/06, 4/30/08, 9/26/08, 8/19/09, 12/28/12, 4/17/13, 9/2/14, 10/7/17, and 11/7/17. Adult male. Tail length = 240 mm. Sex determination based on tail length.
6. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 2/6/06, 4/3/09, 7/28/09, 12/3/09, 2/11/10, 9/3/10, 5/18/11, 1/9/12, 10/31/12, 4/11/13, 7/29/13, 1/3/14, 7/7/14, 3/11/15, 3/1/16, 4/29/16, 6/8/17, 10/26/17, and 11/8/17. PAPILOMAS (Balazs Tumor Score = 2 {moderate}, Total Tumor Score = 4). Large papilloma tumor in each tag scar.
7. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 5/29/09, 7/24/09, 11/18/11, 4/11/13, 2/9/15, 7/2/15, 10/30/16, 9/21/17, 10/11/17, and 11/10/17. Moderate fresh scrapes behind right eye and around nares. Turtle missing 95% of right rear flipper (healed). Old compression injury or congenital deformity to carapace (margins compressed inward along both sides, mid-carapace).
8. Adult female. Tail length = 263 mm.
9. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 3/1/04, 11/3/04, 11/21/04, 7/8/05, 8/12/05, 9/13/05, 4/24/06, 9/29/06, 11/19/06, 12/4/06, 12/9/07, 2/10/08, 4/3/08, 9/14/08, 11/26/08, 12/18/08, 12/14/09, 1/11/10, 9/21/10, 7/25/11, 10/13/11, 7/12/12, 12/16/12, 8/19/13, 2/12/14, 5/7/14, 1/4/16, 4/26/16, 10/23/17, and 11/14/17.
10. PAPILOMAS (Balazs Tumor Score = 2 {moderate}, Total Tumor Score = 33). Turtle missing 5% from posterior carapace and 90% of right rear flipper. Carapace and flipper damage are old/healed.
11. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 7/30/16, 9/17/16, 1/7/17, 10/23/17, and 11/18/17. New Inconel tag inserted on this capture event.
12. Adult female. Tail length = 270 mm. Longitudinal 27 cm crack through middle of posterior end of carapace and another 17 cm crack through the 4th and 5th right costal scutes.
13. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 12/23/09, 3/23/10, 9/22/10, 1/31/11, 10/13/11, 11/17/11, 12/20/12, 3/27/15, 8/3/15, 1/9/16, 2/26/16, and 11/19/17. New Inconel tags inserted on this capture event.
14. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 8/5/08, 5/10/11, 6/13/11, 7/25/11, 7/7/12, 2/5/13, 3/20/13, 5/7/14, 1/3/15, 4/16/15, 6/15/15, 5/30/17, 7/24/17, 10/21/17, and 11/20/17.
15. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 11/12/11, 2/22/15, 11/5/17, and 11/29/17.
16. RECAPTURE. Turtle was removed from the intake canal, tagged and released at Hutchinson Island on 9/26/10, 1/17/16, 5/24/17.
