Dear Mr. Parr:

In response to your letter of October 28, 1977, regarding containment loads resulting from operation of safety relief valves, PP&L plans to proceed with a Susquehanna unique analysis to determine what impact exists on the Susquehanna plant. Due to GE's commitments for this analysis on Mark III and other plants, PP&L will be unable to submit the results until March 1978. If design changes prove to be necessary for Susquehanna, they will be identified at that time.

Very truly yours,

A handwritten signature in dark ink, appearing to read 'N.W. Curtis'. The signature is written in a cursive, slightly slanted style.

N. W. Curtis
Vice President - Engineering & Construction
