Docket Nos. 50-387
and 50-388

SUSQUEHANNA STEAM ELECTRIC STATION
COMPLIANCE WITH APPENDIX I GUIDELINES
ER 100450 FILE 840-2
PLA-111

Dear Mr. Regan:

In an October 8, 1975, letter from Mr. Daniel Muller, two options were described by which we could submit for NRC review and approval the means we propose to use to keep the levels of radioactive effluents from Susquehanna Steam Electric Station to unrestricted areas as low as is reasonably achievable in accordance with Appendix I guidelines. One of the options required submittal of the information identified in Enclosure 2 of that letter by March 31, 1976. The second option required that the information identified in Enclosure 1 be provided in our "Environmental Report - Operating License Stage."

At the present time we have not completed our studies to identify the appropriate option for submitting the requested information. We expect to complete these studies and inform you of our choice of option by July 1, 1976. This schedule was discussed in a phone conversation between Mr. Singh Bajwa (NRC) and Mr. W. E. Barberich (PP&L).

Very truly yours,

N. W. Curtis
