Dear Mr. Parr:

In response to your letter of October 28, 1977, regarding containment loads resulting from operation of safety relief valves, PP&L plans to proceed with a Susquehanna unique analysis to determine what impact exists on the Susquehanna plant. Due to GE's commitments for this analysis on Mark III and other plants, PP&L will be unable to submit the results until March 1978. If design changes prove to be necessary for Susquehanna, they will be identified at that time.

Very truly yours,

N. W. Curtis  
Vice President - Engineering & Construction
