Gentlemen:

SUBJECT: MEETING SUMMARY - DOCKET NOS. 50-259, 50-260 AND 50-296

This refers to the meeting conducted, at your request, in the Region II Office on April 12, 1984. Topic of discussion related to planned TVA organizational changes that would consolidate under one office, activities associated with nuclear power.

It is our opinion that this meeting was beneficial and provided a better understanding of the activities you have initiated in response to NRC concerns.

Should you have any questions concerning this matter, we will be pleased to discuss them.

Sincerely,

James P. O'Reilly  
Regional Administrator

ENCLOSURE

MEETING SUMMARY

Licensee: Tennessee Valley Authority (TVA)

Facility: Bellefonte, Units 1 and 2  
Browns Ferry, Units 1, 2 and 3  
Sequoyah, Units 1 and 2  
Watts Bar, Units 1 and 2

Docket Nos.: 50-438 and 50-439  
50-259, 50-260 and 50-296  
" 50-327 and 50-328  
" 50-390 and 50-391

Subject: To Discuss the Planned TVA Organizational Changes.

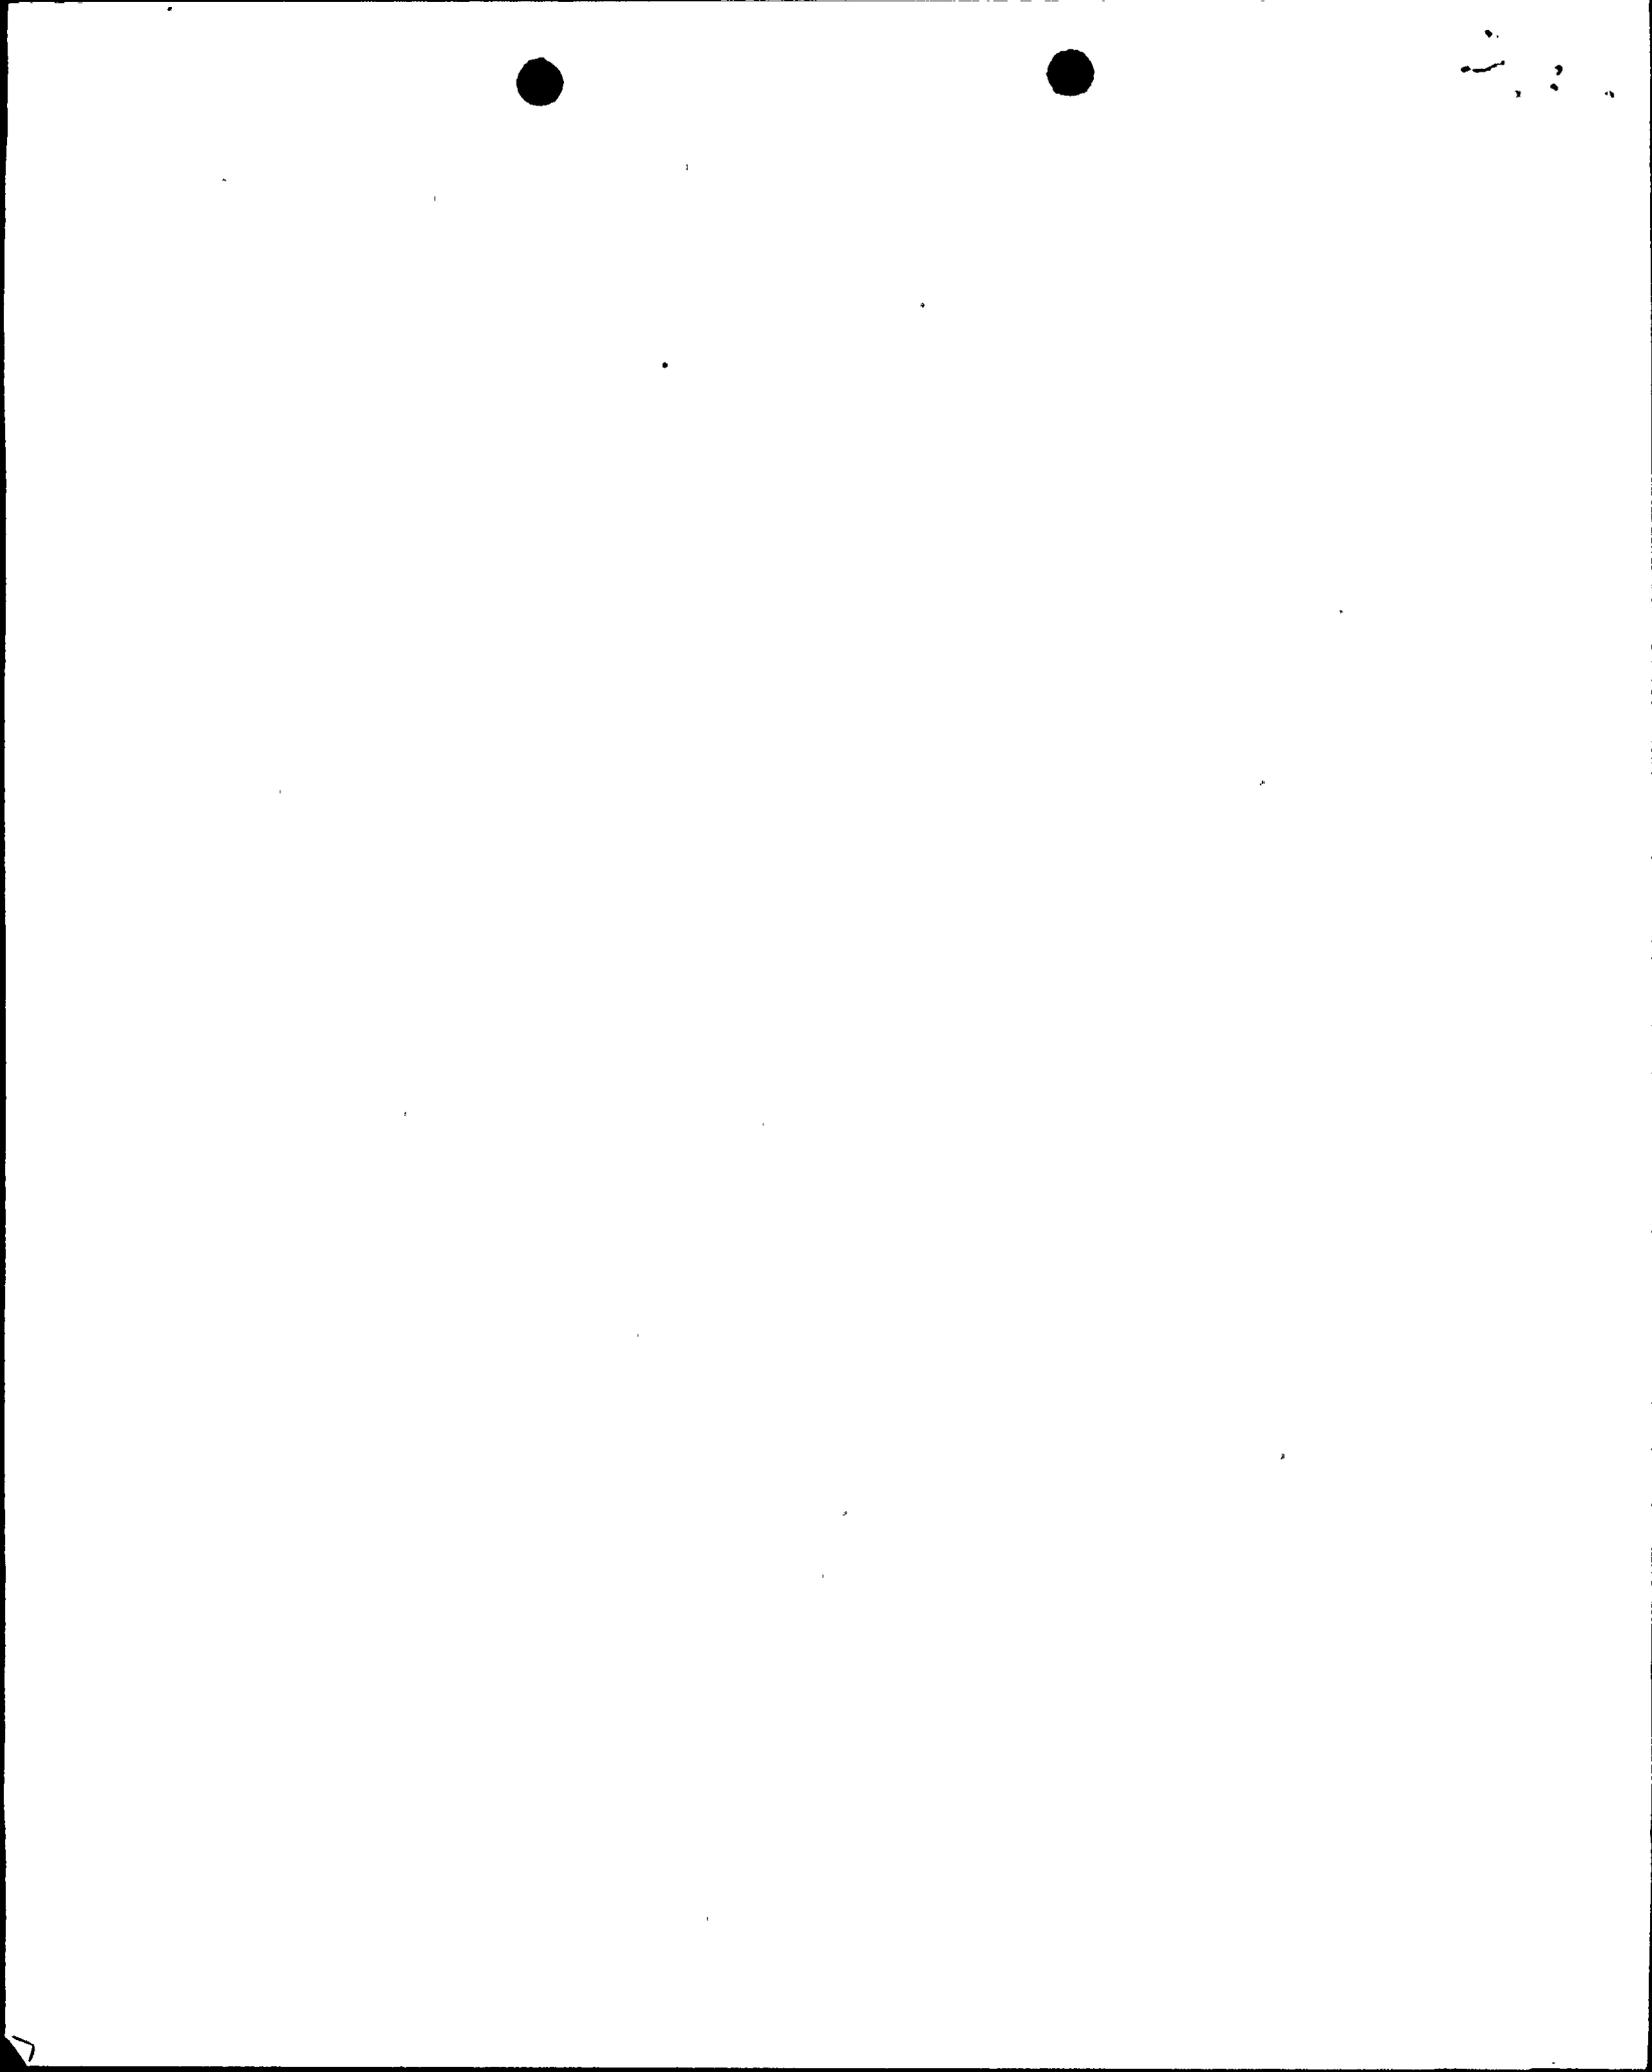

Subject Discussed:

Licensee representatives discussed the preliminary TVA organizational changes that would consolidate under one office activities related to nuclear power. The changes would also relocate site specific resources from central offices to the nuclear sites in order to enhance the support effort. Those support efforts/organizations that are common to all sites will remain centrally located so as to ensure a strong and capable corporate organization. The licensee had not completely defined all aspects of the reorganization, specifically, the functions of the quality assurance organization and public safety. NRC made the observation that special consideration should be given to the portions of these functions which involves nuclear activities. The NRC also suggested that consideration be given by TVA to consider adding dedicated individuals to the new office to handle day-to-day public affairs and legal services that relate to nuclear matters.

The licensee was requested to submit information defining the significant milestones for this reorganization. The licensee stated that they felt such information could be developed in approximately two weeks.

The licensee stated that NRC would be kept updated on their progress by telecon and future meetings of this type.
