TENNESSEE VALLEY AUTHORITY

CHATTANOOGA, TENNESSEE 37401

400 Chestnut Street Tower II

December 17, 1984

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

In the Matter of the) Docket Nos. 50-259
Tennessee Valley Authority) 50-260
50-296

Please refer to L. M. Mills' letter to J. P. O'Reilly dated October 1, 1981, which provided TVA's response to IE Bulletin 80-11, Masonry Walls, for our Browns Ferry Nuclear Plant. As the result of the review of a Nonconformance Report (NCR) seven additional walls have been identified which will require modification to withstand a design basis tornado depressurization event. These walls are identified as follows: unit 1, walls 9 and 22; unit 2, wall 48; and unit 3, walls 1, 69, 80, and 90. These walls will be modified in accordance with the Integrated Schedule for IE 80-11 with the exception of unit 2 wall 48. The modification to this wall could be delayed until the unit 2 cycle 6 outage due to engineering work. Until these walls are modified, the current compensatory measure Tornado Procedure will remain in effect.

If you have any questions, please get in touch with us through the Browns Ferry Project Manager.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

James A. Domer

James A. Domer
Nuclear Engineer

Subscribed and sworn to before
me this 17th day of December 1984.
