JAN 26 2018

Dear Dr. Zhang:

Enclosed is Amendment No. 124 to your NRC Material License No. 13-01284-02 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078. My email address is colleen.casey@nrc.gov.

This amendment only approves the addition of your new location of use at 10 John Kissinger Drive, Wabash, Indiana, for the use of materials in 10 CFR 35.100 and 35.200.

Please note that, since your letter dated October 24, 2017, did not specify whether positron emission tomography (PET) would be conducted at the new location under 10 CFR 35.200, and since no information to support a request for PET use was included, we have excluded PET use from the authorization for this new location.

If you wish to have PET use authorized at the new location, please contact me as described above to discuss the information needed to support such a request.

We noted that the diagram provided for the new location of use and areas of use consisted of a copy of a blueprint and lacked some of the information that using NUREG 1556 Vol. 9, Rev. 2 would have prompted you to include, such as the scale of the diagram or the dimensions of the rooms and locations of shielding. The diagram provided was considered minimally adequate.

In the future, it would be most helpful to submit requests to add new areas of use that are prepared in accordance with NUREG 1556 Vol. 9, Rev. 2, sections 8.15 and 8.16 and Attachment 9.1. Please refrain from submitting blueprints or copies of blueprints as they typically lack the information that we need and show much information that we do not need. Using this guidance helps to ensure that your applications are complete and accurate, as required by 10 CFR 30.9, and enables us to serve you better.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

Y. Zhang

-2-

Please note that the request made in the letters dated October 20, 2017, in particular the second letter pertaining to adding a new location of use for materials in Subitem Nos. 6. through 9.I., inclusive, was insufficient to complete our review. The additional information needed for us to continue our review of this request is in a separate letter, along with instructions on how to submit a response.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

Y. Zhang

-2-

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
