Tennessee Valley Authority)		50-260
			50-296

In accordance with the provisions of 10 CFR Parts 50.59 and 50.90, we are enclosing 40 copies of a requested amendment to licenses DPR-33, DPR-52, and DPR-68 to change the technical specifications of Browns Ferry Nuclear Plant units 1, 2, and 3 (enclosure 1). The proposed specifications would allow the logic surveillance tests to be run "once/operating cycle" during shutdown conditions. This proposed change is part of TVA's response to Violation 2 of Enforcement Action 84-108 submitted to Region II dated July 23, 1985. Description, justification, and safety analysis in support of the proposed changes are enclosed (enclosure 2). A proposed determination of no significant hazards consideration is provided in enclosure 3.

We request that 90 days be allowed after approval of these specification revisions for implementation.

Enclosed is a check for \$150 amendment fee required by 10 CFR Part 170.12.

Very truly yours,
