Docket Nos. 50-387
and 50-388

Dear Mr. Gallo:

We appreciate the valuable insights into emergency operating procedures provided by your inspectors as a result of their inspection this past April. Symptom-based EOPs are fundamental to effective emergency management. PP&L has placed great emphasis on developing our EOPs and training our operators to use them. We were pleased to see that your inspection validated our success.

PP&L has prioritized the items in your report as shown on the attached list. Priority 1 items warrant early consideration. Implementation of corrective actions of these items including training will be completed by June 30, 1991. This coincides with our two-year review cycle for the EOPs.

The adequacy of suppression chamber pressure indication requires special consideration. In response to this concern, PP&L conducted operator training on how to implement the EOPs if suppression chamber pressure is not available. We have completed an engineering analysis of suppression chamber pressure indication and have concluded that the addition of pressure indication in the control room should be pursued. Modifications will be installed in the earliest outage of sufficient duration on each unit following modification design (scheduled design completion 12/01/90).

12

The remainder of the items identified in your report will be addressed in conjunction with our EOP upgrade to Revision 4 of the BWROG EPGs. The upgrade is currently scheduled to be completed by January 31, 1993.

Very truly yours,

H. W. Keiser
