MEMO

Docket Nos.: 50-387
and 50-388 ✓

APPLICANT: Pennsylvania Power & Light Company
FACILITY: Susquehanna Steam Electric Station, Units 1 & 2
SUBJECT: SUMMARY OF A MEETING WITH THE MECHANICAL ENGINEERING
BRANCH AND THE APPLICANT REGARDING OPEN REVIEW ITEMS

A meeting was held in Bethesda, Maryland, on July 14-16, 1980, to discuss open items in the SSES FSAR generated by the NRC's Mechanical Engineering Branch. Representatives of the USNRC, Battelle Northwest Labs, PP&L, GE and Bechtel were in attendance. The attached listings provide the names of the attendees.

The meeting was a working level discussion of the open items identified in the April 21, 1980 letter of Olan Parr (NRC) to Norman Curtis (PP&L). The staff and applicant addressed each open item. The discussions were continued until the staff and applicant reached a mutually acceptable position or closure mechanism for each open item.

The open items discussed included: determination of pipe break location, augmented inservice inspection program, the seismic analysis of piping, dynamic testing and analysis of systems.

The applicant will formalize all the items which were discussed during the working meeting. The applicant indicated that the documentation will be submitted to the NRC on or about September 1, 1980.

Richard M. Stark
