MEMO

Docket Nos.: 50-387
and 50-388

APPLICANT: Pennsylvania Power and Light Company (PP&L)
FACILITY: Susquehanna Steam Electric Station, Units 1 and 2
SUBJECT: DISCUSSION OF SUSQUEHANNA SCHEDULES

A meeting was requested by Pennsylvania Power and Light Company (PP&L) to discuss the results of the NRC Caseload Forecast Panel Review and the NRC licensing schedule. The meeting was held on November 14, 1980 at the Susquehanna site. The attached listing provides the names of the attendees.

PP&L expressed a concern that the construction schedule may not match the licensing schedule. The NRC stated that staff can complete the safety review and make a licensing decision by March 1982. This date is consistent with the caseload forecast panel forecasted plant completion date. During the meeting a detailed explanation of the key licensing milestones was given.

An additional topic was discussed during the meeting. PP&L requested information or guidance relative to licensing a low level radwaste holding facility. The NRC stated that a staff position had been prepared for the Commissioners review and approval. The staff position, when approved, will be released to the public and PP&L, and will describe the low level waste storage options. The NRC expected the approved position paper to be available in several weeks.

The meeting was followed by a tour of the plant.
