Susquehanna Steam Electric Station Docket Nos. 50-387 & 50-388
Safety Evaluation Report
Schedule for Closure of Outstanding Issues (Section 1.9)
ER100450 File 841-2
PLA-735

Dear Mr. Tedesco:

This memorandum is a follow up to our PLA-726, dated April 15, 1981.

Since that time considerable effort has been expended to address the Outstanding Issues in the SER. As a result, we have been able to accelerate the response dates on some items. On others, the technical analysis has required additional time and the scheduled completion dates have slipped two to three weeks. Overall, we expect that complete response will be provided to 82 items by May 15, 1981.

A summary of the Item status and schedule is contained in Attachment 1.

As before PP&L will supply resources to address the Outstanding Issues in support of your plans to issue an SER Supplement. Based on the shcedule in Attachment 1, we could apprecitae notification of the schedules for issuing the Supplement, and for the ACRS sub and full committee meetings.

We will continue to keep you informed of our progress on addressing the SER Outstanding Issues.

Very truly yours,

N.W. Curtis
Vice President-Engineering and Cosntruction-Nuclear
