DEPARTMENT OF THE ARMY  
BALTIMORE DISTRICT, CORPS OF ENGINEERS  
P.O. BOX 1715  
BALTIMORE, MARYLAND 21203

REPLY TO ATTENTION OF:  
NABPL-E

Mr. B. J. Youngblood  
Chief  
Licensing Branch No. 1  
Division of Licensing  
United States Nuclear Regulatory  
Commission  
Washington, D.C. 20555

Dear Mr. Youngblood:

This letter is in response to your Draft Environmental Impact Statement (DEIS) related to the operation of the Susquehanna Steam Electric Station Docket Nos. 50-387-50-388. Comments have been provided in regards to the Corps' areas of concern as they relate to the proposed project.

This agency's areas of concern are flood control hazard potential, permit requirements under Section 404 of the Clean Water Act, and other direct and indirect impacts on Corps of Engineers' existing and/or proposed projects.

Insufficient information has been provided in order for comments to be made with regards to flood plain hazards. It is suggested that the Final Environmental Impact Statement provide information with regards to the 25, 50, and 100-year flood elevations. Any crossings of these flood plains should be extensively explained and mapped. The physical plant should have flood protection up to the probable maximum flood (PMF) level.

A determination has been made that a Department of the Army Section 404 permit will not be required for the proposed construction.

It has also been determined that no impacts are anticipated to any existing and/or proposed Corps of Engineers' projects due to the proposed construction.

The Baltimore District appreciates the opportunity to comment on your DEIS and if we can be of further assistance, please do not hesitate to contact us.

Sincerely,

  
WILLIAM E. TRIESCHMAN, Jr.  
Chief, Planning Division
